

events

```
graph LR; events[events] --> nsEvent[nsEvent::EventManager::pullEvent];
```

The diagram consists of two rectangular boxes connected by a horizontal arrow. The left box is white with a black border and contains the text 'events'. The right box is gray with a black border and contains the text 'nsEvent::EventManager' on the top line and '::pullEvent' on the bottom line. A dark blue arrow points from the right side of the 'events' box to the left side of the gray box.

nsEvent::EventManager
::pullEvent
